SUMMARY

Business systems and project management professional with 3+ years of experience translating business needs into working systems, data-driven insights, and on-time deliveries. Experienced in requirements gathering, process analysis, CRM implementation, and stakeholder management, backed by hands-on data analytics with SQL, Snowflake, Power BI, and Tableau. Currently studying Software Engineering Technology at Centennial College, with practical web development experience. A fast learner who ramps up quickly on new tools and domains. Seeking Business Systems Analyst, Project Manager, and Data Analyst roles where I can bring genuine passion for solving business problems and contribute from day one.

KEY ACCOMPLISHMENTS

- Analyzed and redesigned outreach workflows and dependencies, achieving a 77% improvement in efficiency while preserving system scalability and usability.
- Designed real-time KPI dashboards that improved decision-making speed and cut reporting delays by 41%.
- Delivered a scalable workflow automation framework that reduced process inefficiencies by 28%.
- Built a vendor collaboration framework that improved communication cycles and reduced dependency delays by 20%.
- Led a seven-member team, maintaining accountability and high-quality delivery through shifting priorities.

EXPERIENCE

Program Manager — Spikra Pvt Ltd *Dec 2025 – Jun 2026*

- Led end-to-end Zoho suite implementations (CRM, Projects, Books, Desk) for clients, owning the full project lifecycle from requirements gathering through deployment and post-go-live support.
- Conducted current-state process analysis with client stakeholders, identified gaps, and translated business requirements into configured workflows, automation rules, and system architecture.
- Managed project scope, milestones, timelines, and risk logs, keeping stakeholders aligned through consistent status reporting.
- Coordinated cross-functional teams of technical consultants, developers, and client operations to deliver on-time, on-scope rollouts with minimal business disruption.
- Oversaw data migration, system integration, and user acceptance testing to validate data accuracy and reliable connections with third-party tools.
- Drove user onboarding, training, and change management to accelerate platform adoption.

Technical Program Manager – Data and Ops — Datadrone Inc *May 2023 – Nov 2025*

- Gathered and documented business requirements across marketing, sales, and finance teams, and owned solution design and delivery for each initiative.
- Built and optimized Snowflake data pipelines integrating marketing, sales, and finance sources into a single source of truth for analytics.
- Delivered Power BI and Tableau dashboards giving leadership real-time visibility into pipeline, campaign, and revenue metrics.
- Designed and implemented scalable RevOps and MarTech workflows, aligning operational execution with business objectives.
- Led Bizible–Marketo–CDP integrations, enabling end-to-end attribution tracking and personalized customer journeys.
- Defined and executed QA frameworks to ensure data reliability and smooth deployment of analytics and marketing systems.
- Managed cross-functional dependencies and vendor partnerships, and implemented Agentic-AI playbooks to automate workflows.

PROJECTS

Product Sales Dashboard — *Data Analytics & Visualization*

Led the creation of a Product Sales Dashboard in Power BI and Tableau, integrating Snowflake and Salesforce data to surface sales trends and actionable business insights.

Manufacturing Production Tracking & Analytics Portal — *End-to-End Development & Production Maintenance*

Secure web portal for a Tier 2 automotive CNC machining manufacturer with user login, real-time production tracking, a results dashboard, and individual user performance analysis. Built and deployed end-to-end; continue to handle production maintenance.

Keystroke Monitoring & Intelligent Lockdown System (KeyLock Pro) — *Desktop Application*
Cross-platform desktop security tool built with Python, PyQt5, and MySQL that monitors keystrokes, detects anomalies, and enforces real-time system locks for corporate WFH employees.

SKILLS

Business Analysis: Requirements Gathering & Documentation · Process Analysis & Gap Analysis · Solution Design · User Acceptance Testing · Change Management & User Training

Project Management: Project Lifecycle Management · Scope, Timeline & Risk Management · Stakeholder Communication · Cross-Functional Team Leadership · Vendor Management

Data & Analytics: SQL · Snowflake · Power BI · Tableau · KPI Dashboards & Reporting · Data Pipelines & Data Migration

Systems & Tools: Zoho (CRM, Projects, Books, Desk) · Salesforce · Marketo · Bizible · Segment CDP · Google Cloud

Development: Python · MERN Stack (MongoDB, Express, React, Node.js) · MySQL · Testing & QA

EDUCATION

Advanced Diploma, Software Engineering Technology — Centennial College, Toronto, ON *2026 – Present*

B.E., Computer Science and Engineering (Honours) — Anna University, Chennai *2021 – 2025*

CGPA: 8.65

CERTIFICATIONS

- Segment Certified CDP Analyst — Twilio
- AI Dashboard Using Microsoft Power BI — Skill Nation
- Android App Development — National Small Industry Corporation (NSIC)
